Weed Control with Premium Turf Food

NON-AGRICULTURAL REQUIREMENTS
 The requirements in this box apply to users of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses. Do not enter or allow others to enter the treated area until dusts have settled. If soil incorporation is required after the application, do not enter or allow others to enter the treated area (except those persons involved in the incorporation) until the incorporation is complete. If the incorporation is accomplished by watering-in, do not enter or allow others to enter the treated area until the surface is dry after the watering-in.

IMPORTANT: In addition to providing turfgrass with required nutrients this product will control both **Annual Broadleaf**, **Annual Grass**, and **Annual Monocot**.

FOR WEEDS THAT ARE PRESENT: includes broadleaf weeds from the list such as Chickweed, Creeping Charlie, Dandelion, Evening Primrose, Florida Beauty, Florida Pusley, Lippin, Docks, Pigweed, Plantain, Rabbit Tobacco, and Tansy.

FOR WEEDS GERMINATING FROM SEEDS: Applied before weeds germinate, includes grassy weeds from the list such as: Crabgrass, Proso millet, and Spotted Spurge.

WHERE TO USE
 FOR CONTROL of weeds in St. Augustine and Centipede grasses or on residential turf, corporate lawns, recreational areas, golf courses, cemeteries, and athletic fields.

DO NOT USE: on turf being prepared for sale or other commercial use as soil, or for commercial seed production or for residential purposes.

DO NOT APPLY: before weeds sprout since the product acts as a "pre-emergent" herbicide. Established weeds are harder to kill and may require an additional application in the fall or spring. For newly seeded centipede, wait until grass has been moved at least once. Do not plant "sprigs" until one month after application, or seed within 6 weeks after application. For broadleaf weeds apply anytime the weeds are present and actively growing. Early spring application is recommended for best control such as January 1st up to March 1st, otherwise it may be applied up to June 15th with good weed control.

USE PRECAUTIONS
 Sweep product off walks and painted surfaces following application to avoid possible discolorations. Do not apply this product on or over the root zone of ornamental trees and shrubs, nor to bedding plants, flowers, or garden plants since injury to these plants may result. Do not apply to lawns containing grasses or mixtures of grasses other than St. Augustine or Centipede grasses, since injury to those other grasses may result.

DO NOT APPLY THIS PRODUCT IN A WAY THAT WILL CONTACT ANY PERSON OR PET. DO NOT DIRECTLY OR INDIRECTLY CONTACT ANY PERSON OR PET WITH THIS PRODUCT. DO NOT ENTER OR ALLOW OTHERS (INCLUDING CHILDREN OR PETS) TO ENTER THE TREATED AREA (EXCEPT THOSE INVOLVED IN THE WATERING-IN) UNTIL THE WATERING-IN IS COMPLETE AND THE SURFACE IS DRY.

NOTIFICATION

HOW TO APPLY

Apply 3.74 lb to 5.0 lb uniformly over 1,000 sq ft of turf area. (Equivalent to the required 1.5-2.0 lb Atrazine per acre.) Use the lower rate for average weed problems; the higher rate for heavy weed populations. Do not exceed recommended rates. Do not apply more than 4 lb Atrazine (2.4 lb Atrazine as 0.92% product) per acre per year. Apply to dry grass. This product must be watered at 1/4 inch immediately after application.
